

Evolution
UNBIO1-048
M1 1st semester
Monday 9 am - 12 pm
Room 306

08/09 Introduction

15/09 François Parcy - 1) Origin and evolution of flowers; 2) Plant domestication (past, present and possible futures)

22/09 Guillaume Balavoine - Pluripotent stem cells: a common evolutionary origin?

29/09 Virginie Courtier - Eco-evo-devo in non model *Drosophila* species

06/10 (online) Morgan Gaia - Viruses: origin and (co-)evolution

13/10 (symposium IBENS)

20/10 Philippe Vernier - Evolutionary origins of consciousness

27/10 TBA

03/11 André Birgy - Genomic evolution of Enterobacterales and impact on antibiotic resistance

10/11 Nicolas Gompel - The interplay between arising genetic diversity and natural selection

17/11 Arnaud Badiane - TBA

01/12 Guillaume Lecointre - TBA

08/12 Mircea Sofonea - Evolutionary epidemiology of emerging infectious diseases

15/12 Aurélie Hua-Van - Structure, Impacts, and Dynamics of transposable elements in genomes and populations

19/01 examen
